

ABSTRACT

A display device includes a plug device having a housing engageable into a hole of an article for sales, the housing includes a chamber and a spring blade having a projection to engage into a depression of the article, and for detachably attaching the housing to the article. A hanger device includes an actuator engageable into the chamber of the housing, to selectively engage with the spring blade of the housing, and to force and retain the projection of the spring blade within the depression of the article, and thus to detachably 5 lock the housing to the article with the actuator of the hanger device. A locking device may be used to lock the actuator of the hanger 10 device to the housing of the plug device.
